Fuel / Water Separator Sensor (800-25001)

Fuel/Water Separator Sensor Operation

Fuel/Water Separator Sensors monitor the vehicle's diesel fuel for the presence of water triggering the vehicle's warning light to illuminate when it senses water is present.

Fuel/Water Separator Sensor for GM DuraMax Diesels – High Failure Rate Part

GP Sorensen® offers a full line of Fuel/Water Separator Sensors including the sensor for the GM DuraMax Diesels. Since the DuraMax fuel/water separator sensor can easily be damaged during a routine fuel filter replacement, this sensor is a high-failure, high-replacement part.

800-25001 Fits GM DuraMax Diesels (10-01)

- Chevrolet Fullsize Pickup (10-01)
- Chevrolet G Series Fullsize Van / Express (06)
- GMC Fullsize Pickup (10-01)
- GMC G Series Fullsize Van / Savana (06)

The GP Sorensen® Fuel/Water Separator Sensor line includes 11 sensors for Chevrolet/GMC Truck, Dodge Truck, Sprinter, Jeep, and Ford Truck.

800-25004 Fits Dodge

- Sprinter (09-04)

With perfect form, fit and function demanded by today's technicians, all Standard® Fuel/Water Separator Sensors meet or exceed OE specifications for flawless performance and extended service life.

800-25010 Fits Ford

- E Series Fullsize Van (94-88)
- F Series Fullsize Pickup (94-88)
