TechSmart® Engine Coolant Air Bleeder Valve

**Z63010****Chrysler Sebring 2.7L 2006-01****Dodge Stratus 2.7L 2006-01****VIO over 450,000**

TechSmart® added an extra hex receiver to the base of the bleed screw so a wrench can hold the bleed valve in place while using another wrench to turn the bleed screw. This results in less stress on the housing and no leaks because you cracked the housing while bleeding the coolant.

Each housing includes a new coolant temperature sensor and gaskets for a complete drop in replacement.

New bleed screw/
receiver design
