

Using a Quality Heater Core is Key to a Successful Replacement

**REPLACING THE
HEATER CORE...**

**IS NOT A JOB YOU
WANT TO DO TWICE.**

Due to the location of the heater core in most vehicles, technicians may be required to remove the entire dash to complete the repair. This results in a labor intensive and often frustrating process. Duralast® heater cores are leak, pressure, and vibration tested to prevent comebacks.

Full-line coverage for all design types.

Aluminum

- Precision bending of pipes for proper fit and installation
- O.E. tube and fin design for maximum efficiency

Mechanical

- High-grade molded plastic tanks and connections

Copper/Brass Crimp Tank

- Premium grade material to ensure superior heating
